

Present: Mike, Yue Hang, Tonko, Alexei, Jim, Tommy, Yuri, Gene, and myself

== Hardware

- still cannot access west side to check survey point
- watching gas system
- recovering humidifier

== Electronics

- Work proceeding on DAQ improvements, progress being made, no significant news this week

== Software

- received new version of cluster finder from Tonko
- Tommy reports on new version
 - see <https://www.star.bnl.gov/~ctsang/TbyT/>
 - some problem identified, need to see exact reproducibility in results from online and offline CF
 - will start from single common file and event and cross-check with Tonko that results are expected
 - can then move toward higher statistics comparison between old and new CF
- Yue Hang shows slides on URQMD fixed target space charge study
 - improvement seen in simulation results with flatter z-dependence
 - nearly done with this simulation
- Reprocessed AuAu 7.7 with latest codes in dev and dB

== AOB

No new business this week
